Allowable Subject Matter

1. Claims 1-6, 8, 9 and 11-40 allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1, 13, 16, 23-25 and 28 recite a general manifold assembly having a plurality of common elements plus a variety of additional features. The assembly in general includes a collar having a vertical side wall and skirt, a base having a peripheral portion such that the collar skirt sealingly positions over the peripheral portion of the base, a first sample processing device, a first seal between the collar and base and a second seal between the sample processing device and collar. Claims 1 and 27 includes the feature of the collar being positioned directly on the outer perimeter of the first said sample processing device. Claim 16 recites a method of using an assembly that includes the limitations of claim 1. Claim 13 includes the features of a portion of the base flange contacts the slot in the collar and a sealing gasket between the sample processing device and the collar. Claims 23 and 28 recite the limitation of a unitary seal. Claim 24 recites the first sample processing device is seated and recessed within the collar. Claim 25 includes the feature of the top surface of the collar being positioned on the outer perimeter of the first sample processing device.

The Examiner considers the prior art Moring to be the closest prior art. Moring teaches a manifold assembly having the base features described above but not the features of the allowed independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
